The following links are recent news stories from around the United States about specific cases where law enforcement used ALPR alerts and historical ALPR data to generate investigative leads and solve crimes. These are only some of the public stories (many more successful leads are generated every day), and these stories are only from the year. Countless successes like these have been achieved over more than a decade of law enforcement use of ALPR technology. The success of ALPR technology and data in protecting public safety and bringing criminals to justice could not be more clear.
