

## Police Preparedness in Pandemic

The ongoing public health crisis, coupled with the nationwide lockdown and the impending economic hardships, has created a unique law and order challenge. Frontline police personnel are playing a crucial role in managing the pandemic, enforcing social distancing and quarantine orders, ensuring smooth operations of supply chains, and supporting vulnerable populations. The police have been playing a key role in ensuring recovery and continuity of operations across sectors, and their sustained engagement will be required as the lockdown eases. In this context, ensuring the safety of frontline police officers and planning for business continuity is imperative. This note aims to provide the police and the prison administration with a consolidated list of possible measures to be considered during and post the lockdown. The list is based on measures being implemented by the police in different Indian states and around the world with a view to outline the role of police—to support, facilitate, oversee and monitor the situation—during this crisis.
